

FAMI-QS and FIAAA strengthen their cooperation for the region of Australia – New Zealand.

FAMI-QS, the Quality and Safety System for Specialty Feed Ingredients, and FIAAA, Feed Ingredients and Additive Association of Australia, have signed a strategic agreement of cooperation for the adoption of the FAMI-QS Code in the region of Australia-New Zealand. The given name to the implementation of the FAMI-QS Code in Australia through FIAAA is FAMI-QS/FIAAA.

Nowadays, International Trade takes place in a complex legal business environment. As far as the Specialty Feed Ingredients sector is concerned, third party certifications, and FAMI-QS in particular, is thus becoming an important tool in supporting market access and regulatory compliance at global level.

With regards to the agreement, the current FAMI-QS Certification documents and accreditation will apply. FIAAA members may apply to FIAAA for what would be known as FAMI-QS/FIAAA Certification. This will entail an audit against the current version of the FAMI-QS Code and the relevant process document(s) applicable to the operation of the members. The application shall be done according to the current version of FAMI-QS Rules for Operators. Non-FIAAA members can apply directly to FAMI-QS for FAMI-QS certification.

FIAAA will chair the FAMI-QS Local Working Group for the region of Australia-New Zealand and will be the authorised training provider for the region of Australia-New Zealand.

Further information regarding the implementation of the agreement will follow.

About FAMI-QS

FAMI-QS is a preeminent quality and feed safety management system for the sector of specialty feed ingredients. The FAMI-QS Code addresses safety, quality and regulatory compliance in order to minimize hazards and ensure the placing on the market of safe and legal Specialty Feed Ingredients. FAMI-QS is operating under IAF MLA.

About FIAAA

The FIAAA advocates and promotes the safe use of feed ingredients and additives. The intention is a high level of assurance that the feed will neither cause harm to the farm animals when prepared or consumed, nor to the final consumer. This assurance of quality facilitates domestic and international trade in our industry's products, and in agricultural and food commodities as a whole.
